

PURONICS® Commercial Water

The Next Generation of Ionics Solutions

HF Series Conditioner

TW Series Conditioner

HT Conditioner

How much is water actually costing your business? Puronics will reduce the hidden costs.

Minerals in unconditioned water cost businesses millions of dollars in hidden costs each year. Puronics has three solutions to significantly reduce these costs and improve your productivity and profitability. You will immediately realize savings in energy usage and consumption of costly cleaning supplies. Puronics conditioned water generates additional long-term savings by reducing maintenance and premature replacement of appliances and equipment that use water, plumbing and laundered materials.

The low-profile Puronics Model HT conditioner for dishwashers makes a great impression by adding sparkle to silverware, dishes and glassware, even in small kitchens.

Savings in energy usage

Reduce cleaning supply use

Reduce maintenance of equipment

Dishes are cleaner

PURONICS® Commercial Water

The Next Generation of Ionics Solutions

HF Series Water Conditioner

High capacity system for applications requiring intermittent large volumes of quality water

- ▶ Produces up to 250,000 gallons/day
- ▶ Flow Rate – Up to 500 gallons/minute
- ▶ Conditioning Capacity – 10,000-2,000,000 grains/day
- ▶ Controller – Standard 12-day clock timer (optional metered controller)
- ▶ Filter Media Tank – Heavy-duty NSF approved fiberglass reinforced pressure vessel

HF and TW Series Water Conditioners

- ▶ Lead-free solid brass control valve for long lasting reliability
- ▶ FDA approved high capacity nonspheric resin has uniform beads for higher flow rates and efficiencies
- ▶ High polyethylene brine tank (will not crack or rust) with adjustable salt dosage for maximum efficiency

Applications

- ▶ Apartment Complexes
- ▶ Restaurants
- ▶ Health Clubs
- ▶ Beauty Salons
- ▶ Hotels/Motels
- ▶ Resorts
- ▶ Schools
- ▶ Nursing Homes
- ▶ Hospitals
- ▶ Manufacturing
- ▶ Laundries
- ▶ Office Complexes
- ▶ Car Washes
- ▶ Farms/Dairies
- ▶ Boiler Pretreatment
- ▶ Food Processing

TW Series Water Conditioner

Twin tank system for applications requiring uninterrupted high volumes of quality water

- ▶ Produces continuous uninterrupted quality water 24 hours a day
- ▶ Flow Rate – Up to 47 gallons/minute
- ▶ Conditioning Capacity – 10,000-270,000 grains
- ▶ Controller – Metered controller automatically switches exhausted tank into regeneration
- ▶ Filter Media Tank – Two heavy-duty NSF approved fiberglass reinforced pressure vessels

Model HT Hot Water Conditioner

- ▶ Corrosion resistant 6-cycle bronze control valve for long lasting reliability
- ▶ Polished chrome/nickel stainless steel mineral tank
- ▶ High-capacity S-759 resin has uniform sized beads for higher flow rates and recovery time
- ▶ Tested to conditions greater than most commercial applications
- ▶ High density polyethylene brine tank
- ▶ Timer-controlled regeneration for economical use of salt
- ▶ Under counter design to minimize floor space requirements
- ▶ Optional tank sizes and capacity levels are available

Model HT Hot Water Conditioner

Applications

- ▶ Low temperature commercial dishwashers

Your Authorized Independent Dealer:

Please contact our technical department for sizing and application information.

Contaminants or other substances which can be removed by the Puronics® Commercial Water systems are not necessarily in your water. Operational maintenance and replacement requirements are essential for the product to perform as advertised. Actual savings achieved are dependent on your particular spending habits and usage levels.
